HTML ANCHOR TAGS

HTML *ANCHOR* Tag Description and Detail

What is the <a> Tag?

The **<a>** tag in HTML stands for **anchor**. It is used to create **hyperlinks**, which are clickable elements that connect one page or resource to another. Hyperlinks are a fundamental part of the web, allowing users to navigate **between pages, download files, send emails, or jump to specific sections within a page.**

```html
<a href="URL">Link Text</a>
```

✕   Go to Google ⌄

```html
<a href="https://www.google.com">Go to Google</a>
```

Open in New Tab ⌄   ↺   ↶   ↷

```html
<a href="https://www.google.com" target="_blank">Open in New Tab</a>
```

Send Email ⌄

```html
<a href="mailto:info@example.com">Send Email</a>
```

✕   Download PDF Link ⌄

```html
1    <a href="file.pdf" download>Download PDF</a>
2
```
